WE have pleasure in presenting our revised list of Roses, Fruit Trees, and general Nursery Stock for the Autumn and Spring Season 1913-14.

Our Stock of **ROSE TREES** is an exceptionally large and well cultivated one, and most complete in all classes. The **STANDARD** and **BUSH** trees are this season especially fine, and we can supply good specimens of all latest new English and Continental varieties (page 8). We would call attention to the **STANDARD WEEPING VARIETIES** (page 6), which are now in great demand, and of which we hold a large stock of all the most suitable varieties; also to the **POT PLANTS FOR FLOWERING UNDER GLASS** (page 5), which have been carefully prepared for forcing. We would refer to the many Testimonials we print of the success of our Trees in all parts of the Kingdom.

FRUIT TREES are equal in importance to Roses in our Nurseries, and we have many acres of carefully grown trees ready for removal. **Trained Trees** for walls and espaliers; **Pyramids** and **Bush Trees** for gardens; and **Standards** for orchards are all particularly good, the growth being clean and well ripened. We can supply the leading kinds for planting for market in large quantities, and we shall be happy at all times to give advice to intending planters for profit, as to the best cropping and most marketable kinds, and the best modes of planting and cultivation to ensure success.

The lease of one of our Rose and Fruit Tree Nurseries is expiring next year; as we have to clear the land we shall be glad to make tempting quotations where large quantities are required.

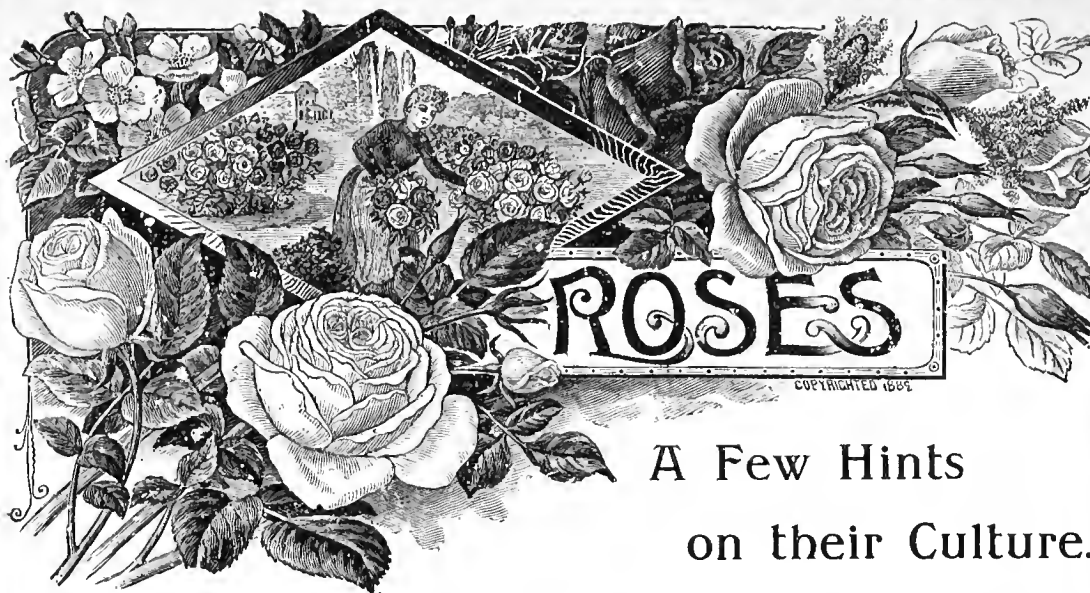

CONIFERÆ, SHRUBS and **ORNAMENTAL TREES** we grow in great numbers, and we respectfully invite an inspection of them, as well as our large stocks of **GREENHOUSE** and **DECORATIVE PLANTS, HARDY and HERBACEOUS PLANTS**, etc., of which we shall be glad to forward priced lists, or make special quotations at any time for anything required.

Assuring you of our very careful attention to your orders at all times,

We are, yours obediently,

GEO. COOLING & SONS.

We keep a Register of Gardeners, Bailiffs, and Stewards wanting situations, and shall be glad to give particulars to any customer requiring an experienced man

A Few Hints on their Culture.

WHEN the plants are received from the Nursery, they should, if the weather is not frosty, be unpacked at once and the roots and tops wetted; if the ground is ready plant at once, taking only a few at a time out of the shelter, so that the whole lot may not be exposed for any length of time to cold drying winds.

SITUATION.—A place apart from other flowers should be assigned to Roses, if possible. Oblong beds not over 4-ft. wide are the best, as the flowers may be cut and examined without treading on the beds. The situation should be an open one, though not exposed to high winds and currents. The south-east or south-west aspect is best, the beds being situated so as to receive the morning sun; roses like a free circulation, but are injured by cold draughts; on the other hand, closeness is apt to generate mildew.

SOIL.—That which they especially delight in is a rich fibrous loam that feels greasy when pressed between the fingers; where this is not to be had the soil should be improved—if light, by the addition of loam or even clay well worked in; where heavy, good drainage and the addition of charcoal in small quantities will help it, but in such places drainage is most important. The ground should be deeply trenched, well rotted animal manure being plentifully added; if the soil be old garden soil, add good fresh loam, rich and yellow; if heavy clay, some burned earth, road sand, or leaf mould should be added. For Briars the loam if somewhat adhesive in quality will be all the better.

PLANTING.—Choose a fine day for the operation; rather than plant when the ground is very wet lay the plants in for a day or two and wait. Dwarf or Rose Bushes should be planted with the collar of the bud or point of union with the stock, at least two inches below the surface of the soil. Standard Roses should not be planted too deep—a few inches depth of soil above the roots is sufficient; but firmly stake each tree to prevent the wind rocking it, this last operation is essential to success. When planted amongst other subjects in the borders, a hole should be made about 18-inches deep, and large enough to contain half a wheelbarrowful of a compost of two-thirds strong turfy loam (if it can be procured from an old pasture it is preferable) and one-third well decomposed animal manure, in the midst of this the tree should be planted and trodden in firmly; a little sandy mixture near the roots induces fresh fibre.

WATERING.—Should dry weather follow planting, let the trees have a good soaking of water, and syringe the tops; especially is this necessary with those planted in spring. Large numbers which die every year from the effects of drying winds would be saved if care were taken in watering and syringing as here recommended. When coming into bloom, if weather is dry, give a good soaking once or twice a week, and at this time liquid manure may be used with advantage.

MANURING.—Roses are gross feeders, and will take almost any amount of manure. A layer six inches deep of half-decayed hot-bed manure laid on the beds in November and forked in the following Spring, is an excellent dressing; cow and pig manure, when available, is also good.

PRUNING.—This should not be done at the time of planting. If the trees are planted in the Autumn March is the best month; if Spring planted April will be sufficiently early; the latter month is also the best for pruning the Tea-scented and Noisette kinds. The strength of the shoot must determine the extent of the shortening—if vigorous, leave it much longer than that which is weak; as a rule the stronger kinds should be left 12 to 18 inches long with 5 to 6 eyes, the weaker growing 6 inches with 2 to 4 eyes; these remarks apply mostly to Hybrid Perpetuals. Tea-scented and Noisette Roses should only have the weak growth thinned out and the strong shoots topped. The Summer varieties of Moss Roses should be only sparingly pruned. Do not let established plants of any kind of Rose become crowded with branches, but carefully thin out all small and unripened wood. In all cases prune to a bud pointing outwards.

COOLING'S SOMERSETSHIRE Collections of Rose Trees

Either of the following Collections, large or small, will be forwarded **Carriage and Packing Free** to any Railway Station in England or Wales upon receipt of P.O.O. or Cheque for the amount quoted.

These assortments are offered for the convenience of the large number who are not acquainted with the great variety of Roses now in cultivation and who are at a loss when selecting from the Catalogue. The prices quoted are considerably less than if the kinds were individually chosen; but growing large quantities of what we know to be the very best varieties we are enabled to include them at the lowest price. The Collections have been very largely sold during past years, and give very great satisfaction.

The Selection of Varieties must in all cases be left to Ourselves; purchasers selecting their own varieties will be charged the individual price for each kind as quoted in the Catalogue. But in ordering, if customers will send a list of the sorts they already have a distinct selection shall be made; and if the nature of the soil and situation is also mentioned only the most suitable kinds will be included.

TALL STANDARD WEEPING ROSES.

Standard Weeping Roses have been much in demand for centres of beds, for planting singly on the lawn, or any part of the garden; they form most striking and attractive objects. We have grown the following varieties which are the most suitable.

3 to 3½ ft. stems, 2/6 to 3/6 each; 4 to 5 ft. stems, 5/- each;

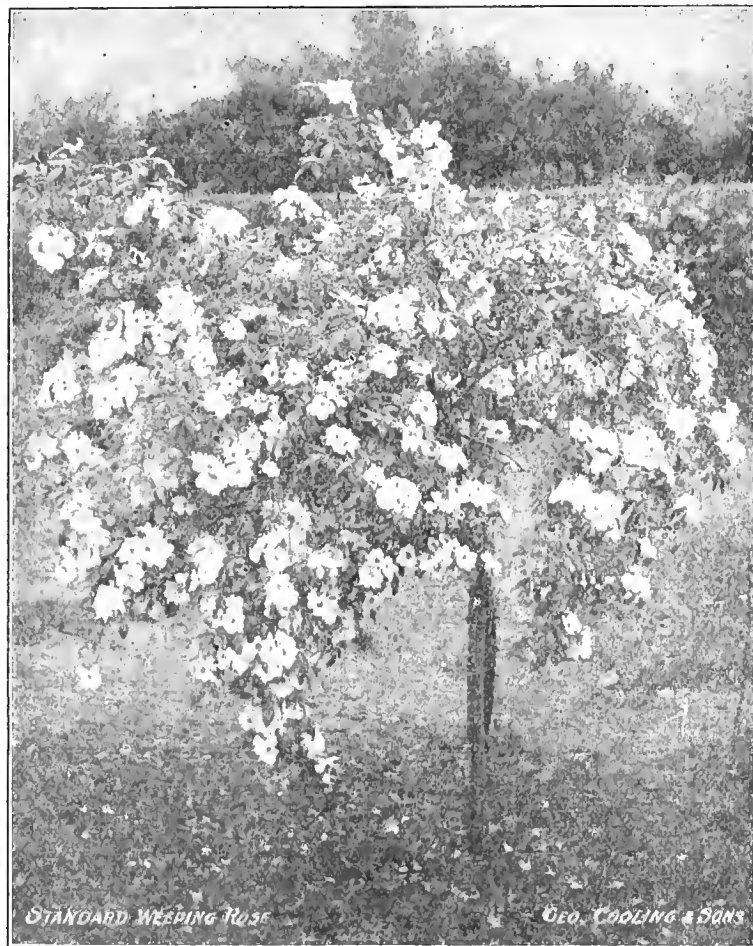

5 to 7 ft. stems, 6/- to 7/6 each.

BRIAR ROSES.

The Austrian and Persian Yellow Briars are amongst the most beautiful and distinct of all the old fashioned Roses; they are perfectly hardy, and should be allowed to grow wild with scarcely any pruning; this is necessary, as they always flower upon the ripened wood of the preceding year's growth. We also suggest these Briars being grown as Pot plants; plants with long shoots potted up in autumn flower freely in spring, and are exceedingly novel and pretty amongst plants in the conservatory.

WICHURAIANA OR WEEPING ROSES.

A fine free growing group of roses, with shiny evergreen foliage and long creeping habit. The flowers are produced in great profusion, and are particularly fragrant and lasting. A distinct race of Garden Roses, most valuable for covering old walls, rustic work, and short pillars, or creeping over banks of earth or tree stumps; they are most decorative. We think these beautiful trailing roses will be very popular when they become known.

FRUIT TREES.

THE following is a very select list, comprising the most reliable and best known varieties in their respective classes. Any variety not mentioned can be supplied, if notice of a day or two be given.

Purchasers will greatly oblige if they will add to their orders a few supplementary names which we may use if any of the first-named are sold out.

We would also suggest to those of our patrons who have not an intimate acquaintance with the various kinds of Fruit Trees, that it would be to their advantage to leave the selection of varieties in our hands, stating the purpose for which the Trees are required, the aspect in which they are to be planted, and the nature of the soil. In this case they may be assured their confidence will not be misplaced, as the selections will be made with the best judgment and care.

The varieties printed in large type can be specially recommended.

Bowood Muscat. A rich amber-coloured grape, finely flavoured.

Black St. Peter's. One of the best late varieties for flavour.

Buckland Sweetwater. An excellent early white variety, and a great bearer, bunches and berries long and of pale amber when ripe; well flavoured.

Cannon Hall Muscat. Larger bunches and berries than *Muscat of Alexandria*.

Foster's Seedling. (White). Very early, free, and of good quality; a first-rate early grape.

Gros Colman. A handsome black grape. The bunches and berries are alike of enormous size, very juicy and sweet.

Gros Maroc. A remarkably fine late black grape, berries very large and flavour excellent.

Hamburgh. (Black). Well known as one of the best and most popular of grapes.

Hamburgh Mill Hill. (Black). Of first-class excellence; succeeds well in an ordinary vinery.

Lady Downes. (Black). Berries large and oval in shape, flesh firm, sweet, and richly flavoured; one of the best for late crop, and an excellent keeper.

Madresfield Court Black Muscat. Bunches long, berries large, and of a rich Muscat flavour; a superior grape, and an excellent keeper.

Mrs. Pearson. (White). Berries large and oval, of golden colour, and forms a handsome bunch.

Muscat of Alexandria. A delicious grape, bunches large and well shouldered, berries also large and of a greenish-yellow, becoming a fine amber colour when thoroughly ripened.

Muscat, Mrs. Pince's. (Black). An excellent variety, flesh firm, with fine Muscat flavour.

Muscat Hamburgh. (Black). A highly flavoured grape, having large well-shouldered bunches and large berries.

We were awarded the Royal Horticultural Society's Knightian Silver Medal and First Prize for our collection of Hardy Fruit at the October Exhibition.

HYBRID BERRIES & BLACKBERRIES.

GEO. COOLING & SONS are offering this Autumn a large stock of the various kinds of Hybrid Berries. The popularity and usefulness of the Loganberry has caused many interesting hybrid varieties to be raised; all are valuable additions to our small fruits, invaluable for preserving, and perfectly hardy, and are, in addition, most useful and ornamental for training over arches, wire fences, or covering unsightly corners.

Per doz.—s. d.

The Loganberry. A hybrid between the red Raspberry and Blackberry, berries are large, deep reddish maroon in colour, and rich in flavour; good for dessert and excellent for preserving; very hardy, standing the severest weather without injury.

Strong fruiting canes 1/- each; 9/- per doz.; Smaller canes 9d. each; 6/- per doz.

The Lowberry. A cross between the common Blackberry and the Loganberry. Fruit borne in clusters, are 1½ inches long; jet black when ripe, juicy, and of the true Blackberry flavour, promises to be a valuable dessert fruit. Does best in a sunny position to ensure the thorough ripening of both canes and fruit

1/- each 12 0

The Laxton Berry, new. Raised by Messrs. Laxton, and described by them to be far superior to the Loganberry, combining the vigour of the Loganberry with the flavour of the Raspberry; remarkable for its perpetual habit of fruiting, producing blooms and fruit from June to November

2/6 each 24 0

THE MAHDI. Award of Merit, R.H.S. A hybrid between the Raspberry and Blackberry, thoroughly hardy; a strong grower and good bearer. The fruit is of a deep purplish-red colour, and ripens at end of July and early in August, and is of excellent flavour. As it is later than the Loganberry and earlier than the Blackberries, it will be a most useful fruit.

Strong plants 1/6 each; 15/- per doz.; Good plants 1/- each; 9/- per doz.

Phenomenal Berry. Raised by Mr. L. Burbank, a cross between the Californian Dewberry and Cuthbert Raspberry; very similar, but stronger in growth than the Loganberry. The fruit is produced in large clusters, and it is a very heavy cropper

1/- each 10 6

Rubus Innominitis, new, a type of the Blackberry from North China; it produces a profusion of orange-red fruits in September, the stems have a velvety appearance, and the bold foliage and bright colour of the fruit combines to make this a most ornamental and attractive addition

1/6 each 12 0

The Wineberry. A Japanese variety, very hardy and vigorous, clusters of mulberry shaped fruit of a scarlet wine colour. Very sweet and juicy, and making a splendid preserve

1/- each 9 0

The Strawberry-Raspberry. An interesting fruit from the Himalayas, very hardy and prolific, has fruited well with us this year

1/- each 10 6

The Himalaya Berry, new, from the Himalaya Mountains. Very strong grower, producing large clusters of fruit about the size and colour of very fine Blackberries

1/6 each ..

The Newberry. A cross between the well-known Loganberry and Superlative Raspberry, giving it the habit of the former with the delightful flavour of the latter. The canes grow to a height of ten to fifteen feet, each bearing 100 to 200 fruit, about two inches long, forming with their pretty foliage an ideal covering for arches or pergolas. This new fruit was very finely shown in the Horticultural Tent at the Royal Agricultural Society, at Bristol this year.

Strong canes 2/6 each; 24/- per dozen.

BLACKBERRIES.

Crataegifolius, handsome foliage, small red fruit 9 0

Dorchester, prolific and excellent; hardy 6 0

Eldorado, one of the best of the American Blackberries, quite distinct, fruit produced in large clusters, and ripens much earlier than British varieties 9 0

Parsley-Leaved Blackberry—Rubus laciniatus. Attractive cut foliage; a good climber. Most suitable for arches and trellises 6 0

WILSON JUNIOR, the best of the American varieties; very large and glossy fruit of delicious flavour 8 0

From Rev. W. HANLON, Innishannon.—“Too much cannot be said in favour of the Loganberry. The bearing is marvellous.”

STRAWBERRIES.

GEO. COOLING & SONS devote special attention to the cultivation of STRAWBERRY PLANTS, the Bath district being a large Strawberry producing centre they have unusual opportunities for noting and selecting the best varieties. The runners have been carefully prepared, and a good supply is now ready.

The prices quoted are for strong plants from the open ground, but all the varieties can also be supplied established in small pots at an additional charge of 1/6 per dozen, or 10/6 per 100 to the prices mentioned; by planting such, a crop of fruit may be almost ensured the first year, or the plants may be grown on, by being potted into larger sized pots, for early and late forcing.

NEW RHODODENDRONS.

The following are amongst the most beautiful of the new Rhododendrons sent out of late years. We can highly recommend them. The Pink and White Pearl are grand varieties.

DONCASTER. Intense scarlet, very free flowering.—3/6.

DUKE OF YORK. Bright rosy pink, with large brown spots on the copper petals, very free flowering.—5/-

PINK PEARL. This beautiful new Rhododendron is one of the finest introductions of late years, it produces enormous petals and truss, and is of clear flesh pink in colour, equally valuable as a pot plant or for outdoors.—3/6, 5/- and 7/6, according to size.

WHITE PEARL. A charming companion to the above, producing large trusses of white flowers, faintly flushed with palest pink, foliage of a rich green; fine for forcing.—3/6, 5/- and 7/6 each.

HELEN PAUL. Soft peach, with the petals tipped and margined with pink, large truss freely produced on young plants; most distinct and good.—5/- and 7/6 each.

Mrs. CHARLES BUTLER. White with bluish tint, deliciously scented.—5/-.

JOHN BENNETT POE. A rich cream with large green blotch on top petal, the blotch spotted with black; most distinct and good.—Each 5/- and 7/6.

STRATEGIST. Bright clear pink, very large truss; a fine variety.—5/-.

Rhododendrons—General Collection.

The varieties of this grand race are now so numerous that we have only given a few of the most distinct kinds from our large collection of Hybrids, which we can furnish at 18/-, 24/-, 30/- and 42/- per dozen, or £6 10s., £8 10s., £10 10s., to £15 per 100. An effective mass can be made by backing up the named sorts with *Ponticum* and seedling varieties, which are cheaper.

CLEMATIS.

These hardy and easily cultivated climbing plants should be found a place in every garden ; whether used for covering old walls, verandahs, rustic poles or pillars, or for bedding, they are unsurpassed. Nothing produces so grand and gorgeous an effect as a well-flowered bed of the beautiful varieties of *Jackmanii* which produces their rich deep-coloured flowers in great profusion throughout the summer and autumn.

The only secret of success in growing them is a good rich soil ; an annual mulching should be given of horse or cow manure, and during the growing season, a few liberal soakings of liquid manure.

Collection of Clematis.

One Dozen choice and distinct varieties of our selection, Spring, Summer, and Autumn flowering kinds to produce bloom from May until October, 15/-.

Half-a-dozen distinct kinds, as above, 9/-.

Spring & Summer Flowering Clematis.

Flowering during May, June and July.

As these flower upon the ripened wood of preceding year's growth, they must be but slightly pruned in winter.

Carriage of Roses, Fruit Trees, &c.

GEO. COOLING & SONS pay Carriage on all Orders for **Rose Trees** (excepting Plants in Pots) of 21/- in value and upwards to any Railway Station in England and on Orders of 42/- to Scotland and Ireland. **Fruit Trees** are sent Carriage Free when the Order amounts to £3 in England, and £5 for Scotland and Ireland. In all smaller orders than the above we add an extra plant or plants to compensate for carriage.

Roses in Pots, Ornamental Trees, Shrubs, etc., we cannot undertake to send Free of Carriage, but will in all cases add liberally to the number ordered to compensate.

Dwarf Roses up to about 12 in number may be sent in one package by Parcels Post, and we will forward in this manner if any of our Customers wish.

Customers in ordering will much oblige by giving instructions as to the most direct way of forwarding, name of station, etc., to ensure prompt delivery.

A Discount of 5 per cent. allowed off all amounts above 20/- paid within 14 days' date of invoice. All Accounts due, without deductions, at Midsummer and Christmas Post Office Orders to be made payable to **Geo. Cooling & Sons**, at the **Head Office, Bath**. Cheques crossed "*Union of London & Smiths Bank, Bath.*" A remittance or reference is respectfully requested from those sending their orders for the first time.

The full price allowed for all packages if returned carriage free and in good condition within a month.

Plants will be so packed that they may stand a journey of a week or ten days without injury. Should the packages arrive at their destination during a severe frost it will be advisable not to unpack them, but to keep them cool and moist, out of reach of frost, until a change of weather takes place.

Failures sometimes take place in the removing and transplanting of all kinds of trees. This may occur through a variety of circumstances, such as severe frost and drought, cold north-easterly winds in spring, want of the usual care in planting, and other causes for which it is impossible for the nurseryman to be accountable. The greatest care is taken to supply healthy and strong plants of everything required; and if on receipt any are broken in transit, or not satisfactory, we shall be pleased to make every compensation: but complaints received months afterwards cannot be taken into consideration.

FOREIGN ORDERS.

We take special care in the selection of Roses and other Plants, Trees and Seeds for exportation, and our system of packing has proved most successful; only well-ripened plants and most suitable varieties are chosen, and every care is taken to secure their safe arrival.

FOREIGN PARCELS POST.—Parcels of Roses may now be sent by post to British Colonies and to most Foreign Countries.

N.B.—Foreign and Colonial Orders must in all cases be accompanied by a remittance; this should include sufficient to cover cost of packing and carriage when latter has to be paid in advance.

From Mrs. R. R. FOX SMITH, Port Elizabeth, South Africa: "The Roses you sent are splendid, all have done well."
